

Muddy's Whacky Scooter Bash

About Variety

Children growing up with disability, serious illness or disadvantage need help from a special charity.

That charity is Variety – the Children’s Charity.

Variety works with individual families and organisations to deliver three core programs that help children with special needs to live, laugh and learn.

Our **Freedom Program** provides mobility equipment, such as wheelchairs, bikes, walkers, Liberty Swings and Sunshine Coaches so children can get out and about.

Our **Caring for Kids Program** provides essential medical equipment to help parents care for their seriously ill child at home and in hospital.

Our **Future Kids Program** provides children with intellectual or physical disabilities the equipment to assist with learning difficulties.

With no government funding it is through the generosity of the community that enables Variety to impact the lives of 25,000 children a year.

About Lions Children’s Mobility Foundation

The Australian Lions Children’s Mobility Foundation motto is – “WALK WITH PRIDE” and was founded to fund mobility devices for children with disabilities, giving children the chance to walk.

The Australian Lions Children’s Mobility Foundation (A.L.C.M.F) was formed in 1999 with a commitment from the Lions of Australia, to purchase a walking device (feet must be on the ground) for every child in Australia with a disability, providing the child is assessed by a trained physiotherapist; most of the children requiring walkers have cerebral palsy.

Since the Foundation was formed, 1570 children have been provided with walkers. There are many and varied types of walkers used, depending on the child’s needs; many of these have allowed children to walk for the first time.

Not only does the “Walker” allow the child to walk, but the upright position also helps their respiratory and digestive system to develop and function properly.

The child’s self-esteem increases because they can access their environment and play with their peers. The health, social and personal benefits that these children and their families experience, cannot be underestimated.
